

Interview Summary	Application No.	Applicant(s)	
	09/377,629	CURTIS ET AL.	
	Examiner	Art Unit	
	Eric B. Kiss	2192	

All participants (applicant, applicant's representative, PTO personnel):

(1) Eric B. Kiss. (3) _____.

(2) Janaki K. Davda (Reg. No. 40,684). (4) _____.

Date of Interview: 06 July 2005.

Type: a) ☒ Telephonic b) ☐ Video Conference
c) ☐ Personal [copy given to: 1) ☐ applicant 2) ☐ applicant's representative]

Exhibit shown or demonstration conducted: d) ☐ Yes e) ☒ No.
If Yes, brief description: _____.

Claim(s) discussed: 1, 5, 10, 14, 19 and 21-27.

Identification of prior art discussed: N/A.

Agreement with respect to the claims f) ☐ was reached. g) ☒ was not reached. h) ☐ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: See Continuation Sheet.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN ONE MONTH FROM THIS INTERVIEW DATE, OR THE MAILING DATE OF THIS INTERVIEW SUMMARY FORM, WHICHEVER IS LATER, TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

Examiner's signature, if required

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Parties discussed a proposed Examiner's Amendment that would place the application in condition for allowance. In particular, the Examiner proposed amending independent claims 1, 10, and 19 to contain the limitations recited in dependent claims 5, 14, and 23, respectively. Additionally, the Examiner proposed an amendment to claim 19 to overcome a possible rejection under 35 U.S.C. 101 (for claims 19 and 21-27). Applicant refused the proposed amendment, indicating a preference for a new Office action, containing the proposed 35 U.S.C. 101 rejection and indication of allowable subject matter. An informal, draft copy of the proposed Examiner's Amendment is attached.

The Examiner proposes amending the claims as follows:

Please cancel claims 5, 14, and 23.

Please amend claims 1, 10, and 19 as follows.

Claim 1 (Currently Amended) A method for accessing variables from an operating system, comprising:

receiving a command from an application program for at least one variable maintained by the operating system;

determining whether the at least one variable is in a data object;

if the at least one variable is in the data object, returning the at least one variable to the application program; and

if the at least one variable is not in the data object,

executing the command from the application program to store at least one variable maintained by the operating system in the data object accessible to the application program, wherein the application program is executing on the operating system;

~~determining an operating system native command to use to retrieve the at least one variable;~~

determining a type of the operating system;

selecting an operating system native command from a set of native operating system commands for different types of operating systems, wherein the selected operating system native command is capable of being executed on the operating system to retrieve the at

least one variable, and wherein the application program is capable of executing on each of the different types of operating systems;

executing the operating system native command in response to the command from the application program to retrieve the at least one variable into a buffer;

storing the retrieved at least one variable from the buffer into the data object; and

executing the command from the application program to retrieve the at least one variable from the data object for return to the application program.

Claim 10 (Currently Amended) A computer system for accessing variables from an operating system, comprising:

a computer;

a memory storing at least one variable;

program logic executed by the computer, comprising:

means for receiving a command from an application program for at least one variable maintained by the operating system;

means for determining whether the at least one variable is in a data object;

if the at least one variable is in the data object, means for returning the at least one variable to the application program; and

if the at least one variable is not in the data object,

(i) means for executing the command from the application program to store at least one variable maintained by the operating system in the data object in the memory accessible

to the application program, wherein the application program is executing on the operating system;

~~(i) — means for determining an operating system native command to use to retrieve the at least one variable;~~

~~(ii) means for determining a type of the operating system;~~

~~(iii) means for selecting an operating system native command from a set of native operating system commands for different types of operating systems, wherein the selected operating system native command is capable of being executed on the operating system to retrieve the at least one variable, and wherein the application program is capable of executing on each of the different types of operating systems;~~

~~[[(iii)]]~~ (iv) means for executing the operating system native command in response to the command from the application program to retrieve the at least one variable into a buffer;

~~[[(iv)]]~~ (v) means for storing the retrieved at least one variable from the buffer into the data object; and

~~[[(v)]]~~ (vi) means for executing the command from the application program to retrieve the at least one variable from the data object for return to the application program.

Claim 19 (Currently Amended) An article of manufacture for use in accessing variables from an operating system, the article of manufacture comprising ~~computer-useable media~~ a computer-readable device accessible to a computer, wherein the ~~computer-usable media~~ the computer-

readable device includes at least one computer program that is capable of causing the computer to perform:

receiving a command from an application program for at least one variable maintained by the operating system;

determining whether the requested at least one variable is in a data object;

if the requested at least one variable is in the data object, returning the at least one variable to the application program; and

if the requested at least one variable is not in the data object,

executing the command from the application program to store at least one variable maintained by the operating system in the data object accessible to the application program, wherein the application program is executing on the operating system;

~~determining an operating system native command to use to retrieve the at least one variable;~~

determining a type of the operating system;

selecting an operating system native command from a set of native operating system commands for different types of operating systems, wherein the selected operating system native command is capable of being executed on the operating system to retrieve the at least one variable, and wherein the application program is capable of executing on each of the different types of operating systems;

executing the operating system native command in response to the command from the application program to retrieve the at least one variable into a buffer;

storing the retrieved at least one variable from the buffer into the data object; and

executing the command from the application program to retrieve the at least one variable from the data object for return to the application program.

-- END OF PROPOSED AMENDMENT --
